

Safe. Smart. Step-by-Step.

PLAN FOR FLORIDA'S RECOVERY

WHAT IS A CASE?

A new case means an individual has tested positive for COVID-19 for the first time.

An individual who tests positive may be:

- **Asymptomatic**
- **Symptomatic but not clinical**
- **Symptomatic and clinical**

COVID-19 TESTING EVOLUTION IN FLORIDA:

February and early March: test if symptomatic and traveled to China (or other international location)

Mid-March through April: test if 65+ and symptomatic regardless of travel history (age limit gradually lowered as April wore on)

May (re-opening): test regardless of age and symptoms

MEDIAN AGE OF NEW CASES FOR 6/19 IN SELECT FLORIDA COUNTIES:

- Broward: 32
- Duval: 29
- Hillsborough: 30
- Orange: 29
- Pinellas: 29
- Seminole: 27

FLORIDA'S HOSPITAL SYSTEM

- **Twice as many beds available than before the pandemic as a percentage.**
- **Far fewer COVID-19 patients in ICU and on ventilators than in April.**
- **Non-COVID hospital patients are tested for COVID.**

KEY POINTS

Florida businesses must adhere to appropriate re-opening guidelines – DBPR will enforce.

DOH Public Health advisory reiterating guidance for:

- **Elderly and vulnerable individuals**
- **Practicing social distancing**
- **Wearing a mask in public settings**
- **Staying home when sick**
- **Frequent hand washing and sanitization**

Safe. Smart. Step-by-Step.
